Open to relocate to UAE (Dubai / Abu Dhabi)

Professional Summary

Databricks Certified Senior Data Engineer / Data Architect with **12+ years of experience** designing, building, and optimizing **scalable, production-grade data pipelines** across **Azure cloud and on-premises environments**. Strong expertise in **Azure Databricks, Azure Data Factory (ADF), ADLS Gen2, PySpark, Spark SQL, Python, SQL, and data modelling**. Proven experience in **end-to-end data engineering, ELT/ETL pipelines, performance tuning, cost optimization, data governance, and modern cloud data platforms**.

Technical Skills

Cloud & Data Architecture: Azure Databricks, Azure Data Factory, Azure Data Lake Storage (ADLS) Gen2, Databricks Workflows, Unity Catalog, Azure Synapse, Azure Logic Apps, Medallion Architecture, Data Governance, Data Modelling

Programming Languages: Python, PySpark, PL/SQL, Shell Scripting

ETL Tools: Informatica PowerCenter, Ab Initio

Databases: SQL Server, Oracle, MySQL

DevOps & Methodologies: GitHub, Agile, SDLC, JIRA, ServiceNow

Professional Experience

Architect

Sep 2025 – Current

Fractal Analytics, Gurugram

P&G India – FMCG

- Designed and optimized Databricks-based data pipelines processing millions of BARC records using **Delta Lake and Medallion Architecture**, improving pipeline performance and reliability for downstream analytics.
- Implemented automated **data quality frameworks(DQX)**, validation rules, quarantine mechanisms, and reprocessing workflows to improve reliability of curated datasets.
- Developed a DQE scorecard to track and improve monthly data quality metrics.
- Designed and implemented **dimensional data models** (Star Schema) including fact and dimension tables to support analytical Power BI reporting and historical analysis.
- GitHub CI/CD pipelines** for multi-environment deployment and version control of data engineering workflows.

- Implemented **Databricks Auto Loader and Structured Streaming** to process continuously arriving data into Delta Lake.

Unilever – FMCG

- Led **Azure Databricks and Azure Data Factory cost optimization** initiatives, reducing overall **production compute costs** by at least 35% across **enterprise data pipelines**.
 - Analyzed high-cost Databricks workloads using **Spark UI and execution metrics** to identify performance bottlenecks.
 - **Optimized** Spark workloads through code refactoring, cluster tuning, and partitioning strategies to reduce data shuffle and improve efficiency.
 - Evaluated multiple Databricks cluster configurations to determine cost-effective setups.
 - Resolved **small file problems** by fine tuning write strategies and file consolidation.
 - Collaborated with **business stakeholders and data consumers** to validate **production data pipelines**.
-

Senior Data Engineer

Jan 2016 – Sep 2025

Tata Consultancy Services (TCS), Gurugram (Viacom – Media, Lloyd’s Bank - BFSI)

Onsite: Uruguay (Jan 2020 – Dec 2020)

- Designed and implemented end-to-end **Azure-based data pipelines** using **ADF and Databricks**
 - Built and maintained **ADF pipelines** with Linked Services, Datasets, and Triggers for automated data ingestion
 - Developed and enhanced **PySpark/Spark SQL** jobs for large-scale data transformation & analytics
 - Automated **incremental data loads** using Databricks notebooks
 - Implemented **Unity Catalog** for centralized governance, role-based access control, and secure data access management across enterprise data platforms
 - Gained architectural understanding of **Azure Synapse** for data integration and data warehousing, along with **Azure Logic Apps** for workflow automation and event-driven integrations.
 - Contributed to cloud modernization initiatives migrating legacy ETL workloads to Azure Databricks Lakehouse architecture.
 - Developed Python scripts for API data extraction and ingestion into cloud storage and databases
 - Engineered SCD Type 2 frameworks to support historical data tracking and auditability
 - Built **DBAMP-based Salesforce integrations**, saving approximately **USD 16K** by avoiding Informatica Cloud costs
 - **Mentored and guided** a team of 5 data engineers, managing delivery via JIRA and ServiceNow
 - Received multiple **client appreciation awards** and “**Star of the Month**” recognitions
-

ETL Developer

Aug 2013 – Jan 2016

Computer Sciences Corporation (CSC), Noida (AXA - Insurance)

- Designed and tested ELT processes using Ab Initio.
- Performed SQL and graph performance tuning for large datasets.
- Converted COBOL copybooks to DMLs for SAS migration projects.

- Conducted data validation and maintained technical documentation.
-

Education

Bachelor of Technology (B. Tech) – Computer Science Engineering

Maharaja Surajmal Institute of Technology (GGSIPU), Delhi | 2013

Certifications

- Databricks Certified Data Engineer – Professional
- Databricks Certified Data Engineer – Associate
- Databricks Fundamentals Accreditation
- Databricks Generative AI Fundamentals Accreditation
